

GradeQuest CBT Manual

Online and Offline exam setup guide for school admins, teachers, and exam officers.

Use Online CBT when internet is stable. Use Offline CBT when students will write through a local WiFi router without depending on internet during the exam.

BEST FOR STABLE INTERNET Online CBT

BEST FOR WEAK INTERNET Offline CBT through a local WiFi server

IMPORTANT RULE Download a fresh offline package when students, fees, timetable, or exam settings change.

Online CBT - Step by Step

1. Open CBT Exams and click New Exam.
2. Enter exam title, class, section, department, subject, duration, date, start time, and end time.
3. Choose Online or Online and Offline as the exam mode.
4. Add questions manually, or import questions from Word, Excel, or CSV.
5. Use Preview to check instructions, passages, questions, options, calculator rule, and timetable.
6. Publish the exam when everything is correct.
7. Students can open the exam from their dashboard or through the public access page.
8. After submission, open the exam workspace to review attempts and export scores.

Offline CBT - Step by Step

1. Install the GradeQuest Offline CBT app on the computer that will act as the local server.
2. Create or edit the exam and choose Offline/LAN or Online and Offline as the mode.
3. Publish the exam. Only published offline or hybrid exams can be packaged.
4. Open Offline Package and click Download Offline Package. This creates the internal package record and downloads the JSON file.
5. Open the offline CBT app on the server computer and upload the JSON package.
6. Connect student computers to the same WiFi or router as the server computer.
7. Share the student access link shown inside the offline CBT app.
8. Students enter their admission number, confirm their exam, read instructions, and start.

9. After the exam, export the results JSON from the offline app.
10. Return to CBT Exams, open Offline Package, upload the result JSON, and click Sync Results.

Question Setup Guide

1. Use sections for Paper 1, Paper 2, Objectives, Theory, Essay, Practical, or other exam parts.
2. Use passage/instruction groups for English comprehension, case studies, and questions that share one instruction.
3. When questions are shuffled, passage questions stay attached to their passage.
4. If shuffle options is enabled, option words are rearranged while A, B, C, D labels are reassigned correctly.
5. Use Word import when teachers need images, tables, and formatted questions.
6. Use Excel or CSV import when questions are already structured in rows and columns.

Button Meaning

DOWNLOAD OFFLINE PACKAGE	Creates a new internal package record and downloads the latest exam bundle JSON. Use this first.
RE-DOWNLOAD LAST PACKAGE	Downloads the most recently prepared package again. Use it only if the first download failed or the file was lost.
SYNC RESULTS	Uploads the result JSON exported from the offline CBT app back into the main GradeQuest portal.

Important Checks Before Exam Day

1. Confirm the exam is published.
2. Confirm the class, section, department, and subject are correct.
3. Confirm the timetable is correct.
4. Confirm the students have the right fee access status before downloading the offline package.
5. Download a fresh offline package if anything changes after the first download.
6. Sync each offline result file once. Duplicate result uploads may be rejected.

Professional note: Offline CBT should be prepared close to exam time because the package contains a snapshot of exam settings, student eligibility, and fee access at the moment it was downloaded.
